

Name STANDARD

THIS IS A TEST TITLE

This is the test matter

Regulation

- $\bullet\,$ The time at disposal is 60 minutes.
- Electronic devices are forbidden, except for the scientific calculator.
- It's forbidden talking and standing up during the test.
- No notes and no books are allowed.
- An extra point will be given to who'll follow all the rules and to who'll deliver an ordered test.

Evaluation

100%	The answer is complete and correct with a proper language.
75%	The answer is incomplete, slightly wrong or with an imprecise language.
50%	The answer is incomplete, superficial with diffuse errors and insecure language.
25%	The answer lacks of many parts, with heavy errors or a very insecure language.

Points	≤ 2	3	4	5	6	7	8	9	≥ 10
Grade	2	3	4	5	6	7	8	9	10

Extra	Project	1	2	3	4	5	6	7	8	9	10

Points (13) :	
Grade:	

Different random values

- 1. (1) Question 1: These are values different for everyone: 12 (int) and -1.16 (float).
- 2. (1) Question 2: This is a random value from a set: one.
- 3. (1) Question 3: This question is standard.

Different points and optionality

- 4. (1) Question 4: This question is optional for someone.
- 5. (3) Question 5: This question has three points.
- 6. (0) Question 6: This question has no points.

Set of different representations and new lines

- 7. (1) Question 7: Here is possible doing this in a single string.
- 8. (1) Question 8: This question has some space for answer.
- 9. (1) Question 9: This question is stored in form of an array in the JSON file.

Combining all this stuff

10. (2) Question 10: Hello, take some different values: 9, 15.6 and Hi.

Points (13) :	
Grade:	

Different random values

- 1. (1) Question 1: These are values different for everyone: 38 (int) and -8.83 (float).
- 2. (1) Question 2: This is a random value from a set: two.
- 3. (1) Question 3: This question is standard.

Different points and optionality

- 4. (1) Question 4: This question is optional for someone.
- 5. (3) Question 5: This question has three points.
- 6. (0) Question 6: This question has no points.

Set of different representations and new lines

- 7. (1) Question 7: Here is possible doing this in a single string.
- 8. (1) Question 8: This question has some space for answer.
- 9. (1) Question 9: This question is stored in form of an array in the JSON file.

Combining all this stuff

10. (2) Question 10: Hello, take some different values: 0, 16.32 and Hello.
